

BRAZESH GURAGAIN

Full Stack Developer

Hobart, Tasmania, Australia | [LinkedIn](#) | [GitHub](#) | [brazeshguragain.com](#) | b.guragain1023@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer with a Master of Technology (Software Engineering) and hands-on experience building modern web applications using React, Node.js, Express, MongoDB and AI integration. Completed a structured full stack bootcamp building real-world projects end to end. Brings strong communication and problem-solving skills developed across 3+ years of customer-facing roles.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Bootstrap 5, Responsive Design

Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs

AI Integration: Anthropic API (Claude), OpenAI API (GPT-5 Nano), Prompt Engineering

Tools & Deployment: Git, GitHub, VS Code, Vercel, Render, Yarn

PROJECTS

Time Tracker

Full stack task management app to track weekly hours and identify time wasters.

- Built with React frontend and Node.js/Express backend with MongoDB Atlas for cloud data persistence
- Users add tasks and hours, switch items between entry and bad lists with real-time PATCH calls
- Bulk selection with Select All checkbox — delete single, multiple or all items in one action
- Deployed backend on Render with UptimeRobot monitoring to prevent free-tier spin-down

AI Prompt Diff

One prompt. Two AI models. Side-by-side comparison with metrics and key differences.

- Sends a single prompt to both Claude Sonnet and GPT-5 Nano simultaneously using parallel API calls
- Compares responses side by side with metrics including length, clarity score and response speed
- AI-generated summary of the 3 key differences between both responses
- Discovered GPT-5 Nano used 26x more tokens than Claude for the same prompt due to internal reasoning
- Built with React, Node.js, Express, Anthropic API, OpenAI API — deployed on Vercel with serverless functions

CineTrial

Movie discovery app powered by the TMDB API.

- Fetches a random movie on load to give users an instant discovery experience
- Browse trending, drama and comedy movies with one click category filtering
- Save movies to a personal watchlist that persists across sessions using local storage
- Built with React and the TMDB API with responsive design across all devices

Random User Generator

Dynamic contact directory using the RandomUser API.

- Programmatically generates realistic contact profiles with search and filter functionality

- Built with HTML, CSS and JavaScript consuming a public REST API

Weather App

Real-time weather application fetching live weather data by location.

- Integrated the OpenWeather API to retrieve current conditions by city
- Handled asynchronous API calls using JavaScript Fetch API with dynamic content rendering

Additional projects include Movie World and Prank Calculator — available on GitHub.

EDUCATION

Master of Technology — Software Engineering | Federation University Australia 2019

IIBIT Sydney Campus — Postgraduate qualification covering software design, systems architecture and engineering principles

Full Stack Development Bootcamp | Dented Code Academy Jan 2026 – Present

Completed MERN stack and AI integration — building real-world projects end to end

WORK EXPERIENCE

Support Worker | Christian Homes Tasmania 2021 – Present | Hobart, Tasmania

- Provided tailored support to individuals with diverse needs, adapting communication style for each client
- Maintained accurate case notes and collaborated with multidisciplinary teams to deliver care plans
- Demonstrated empathy, patience and reliability in high-pressure and emotionally demanding environments

Team Member | Woolworths 2022 – Present | Hobart, Tasmania

- Delivered consistent customer service in a fast-paced retail environment serving hundreds of customers daily
- Managed inventory, restocking and point-of-sale operations efficiently
- Worked collaboratively with team members to meet daily store targets and maintain service standards
