

BRAZESH GURAGAIN

Full Stack Developer

Brisbane, Queensland, Australia | b.guragain1023@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with a Master of Technology (Software Engineering) and hands-on experience building web applications using JavaScript (ES6+), TypeScript, React, Node.js, Express, MongoDB, and LLM APIs. Built 10+ web applications, including 3 full-stack systems and a production RAG platform with vector search and LLM-powered generation, deployed independently end to end. Currently developing a multi-tier RBAC system for a workforce scheduling platform, backed by 3+ years of client-facing, high-reliability experience.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React, Vite, Context API, Bootstrap 5, react-markdown, Responsive Web Design

Backend: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication, Bcrypt, Role-Based Access Control (RBAC), Middleware

AI & Vector Search: Anthropic Claude API, OpenAI API, RAG Architecture, LanceDB, Cosine Similarity, Text Chunking, Prompt Engineering

Tools & Deployment: Git, GitHub, VS Code, Vercel, Railway, Render, Postman, UptimeRobot

PROJECTS

Aussie in WorldCup 2026 — Live RAG Chatbot

React, Node.js, Express, MongoDB, LanceDB, OpenAI API, Claude API

- Built a full-stack RAG pipeline: sliding-window text chunking, OpenAI embeddings, LanceDB vector storage, cosine similarity retrieval, and Claude API generation with a re-ranking stage to reduce hallucinations.
- Built custom LanceDB sync logic (drop-and-recreate pattern) to keep MongoDB and the vector database consistent across CRUD operations.
- Built a password-protected admin dashboard for document upload, chunking/ingestion, and synced deletion across MongoDB and LanceDB; deployed frontend to Vercel and backend to Railway with persistent volume storage.

Capital View — Personal Finance Tracker

React, Node.js, Express, MongoDB, JWT, Recharts, Claude API

- Built a full-stack finance tracker supporting 5 income and 11 expense categories, with transactions displayed in a sortable table and visualized via pie, bar, and line charts for spending breakdown and balance trends.
- Built a deterministic forecasting engine projecting 6/12/24-month balance based on historical income/expense averages and category-level spending patterns.
- Integrated the Claude API to generate natural-language suggestions for reducing spend and increasing income, grounded in the forecast engine's category-level output.
- Implemented JWT authentication with bcrypt password hashing; identified and fixed an IDOR issue by scoping all data queries to the authenticated user's ID.

Time Tracker — Full-Stack Productivity App

React, Node.js, Express, MongoDB Atlas

- Built a task management app for tracking weekly hours and identifying time spent on unproductive tasks, with bulk select/delete and real-time PATCH/DELETE requests.
- Configured UptimeRobot monitoring on Render to prevent free-tier server spin-down.

RosterView — Workforce Roster Management System (In Progress)

TypeScript, React, Node.js, Express, MongoDB, JWT

- Built a 4-tier Role-Based Access Control system (Admin, Coordinator, Team Leader, Worker) with custom Express middleware enforcing route- and resource-level permissions.

- Designed a team-scoped authorization model (teamId on every user) restricting Team Leaders to their own team (5–10 members) while Admin oversees the full staff base (~300).
- Modeled MongoDB/Mongoose schemas for Users, Shifts, SwapRequest, and LeaveRequest, with an escalation path routing overtime conflicts to Admin while Team Leaders handle routine approvals.

Additional Projects: AI Prompt Diff — LLM comparison tool; CineTrial — movie discovery app (React, TMDB API).

EDUCATION

Master of Technology — Software Engineering

Federation University Australia (IIBIT Sydney Campus) — 2019

Full Stack Development & AI Engineering Program

Dented Code Academy — Jan 2026 – Present

WORK EXPERIENCE

Support Worker — Christian Homes Tasmania

Hobart, Tasmania | 2023 – September 2026

- Provided tailored support to individuals with diverse needs, maintaining accurate case notes and collaborating with multidisciplinary teams to deliver care plans.
- Gained direct, practical insight into shift scheduling and swap-request challenges — informing the design of RosterView.

Team Member — Woolworths

Brisbane, Queensland | 2022 – Present

- Delivered customer service and managed inventory, restocking, and point-of-sale operations in a fast-paced retail environment.
