

BRAZESH GURAGAIN

Frontend Developer

Hobart, Tasmania, Australia | [LinkedIn](#) | [GitHub](#) | b.guragain1023@gmail.com

PROFESSIONAL SUMMARY

Motivated Frontend Developer with a Master of Technology (Software Engineering) and hands-on experience building modern web applications using React, JavaScript, HTML, and CSS. Currently expanding expertise into Node.js, Express, MongoDB, and AI integration through a structured full stack bootcamp. Brings strong communication and problem-solving skills developed across 3+ years of customer-facing roles in support and retail environments.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React
In Progress	Node.js, Express.js, MongoDB, REST APIs, AI Integration
Tools & Other	Git, GitHub, VS Code, Responsive Design, API Integration

PROJECTS

Movie World

A React movie discovery app powered by the OMDb API.

- Fetches a random movie on launch and allows searching any title by name.
- Users can categorize movies as Drama or Action into a personal watchlist with category filtering.
- Implemented local storage persistence so the watchlist survives page refreshes.

Not-To-Do List (Time Tracker)

A task management app to help users track time and identify unproductive habits.

- Built with React and JavaScript; implemented dynamic state management and real-time updates.
- Designed a clean, intuitive UI using HTML5 and CSS3 with responsive layout.

Weather App

Real-time weather application built with React that fetches and displays live weather data for any city in the world.

- Integrated the OpenWeather API using chained Geo, Weather and Forecast API calls.
- Handled asynchronous API calls using JavaScript Fetch API and rendered dynamic content.

Contact List App

Dynamic contact directory that generates and displays user profiles.

- Consumed the RandomUser API to programmatically generate realistic contact data.
- Built filter and search functionality to improve usability.

Portfolio Website

Personal portfolio to showcase projects, skills, and contact information.

- Designed and built from scratch using React, CSS and Bootstrap with smooth animations and hamburger navigation for mobile.
- Focused on fully responsive design and smooth user experience across all devices.

Prank Calculator

A fun interactive calculator with unexpected behaviours to engage users.

- Built with React and JavaScript; demonstrated creativity, DOM manipulation, and event-driven programming with playful UX concepts.

EDUCATION

Master of Technology — Software Engineering | Federation University Australia

2019 • IIBIT Sydney Campus

- Postgraduate qualification covering software design, systems architecture, and engineering principles.

Full Stack Development Bootcamp | Dented Code Academy

January 2026 – Present • In Progress

- Completing a structured program covering the MERN stack (MongoDB, Express, React, Node.js) and AI integration.
- Building real-world projects applying frontend and backend development skills end-to-end.

WORK EXPERIENCE

Support Worker | Christian Homes Tasmania

2021 – Present • Hobart, Tasmania

- Provided tailored support to individuals with diverse needs, adapting communication style for each client.
- Maintained accurate case notes and collaborated with multidisciplinary teams to deliver care plans.
- Demonstrated empathy, patience, and reliability in high-pressure and emotionally demanding environments.

Team Member | Woolworths

2022 – Present • Hobart, Tasmania

- Delivered consistent customer service in a fast-paced retail environment serving hundreds of customers daily.
- Managed inventory, restocking, and point-of-sale operations efficiently.
- Worked collaboratively with team members to meet daily store targets and maintain service standards.
